

# BODYVIZ

## PERFORM **VIRTUAL DISSECTIONS** USING **REAL HUMAN & ANIMAL ANATOMY**

### **BODYVIZ SOFTWARE REVOLUTIONIZES BIOLOGY & ANATOMY HIGH SCHOOL EDUCATION**

Using computers and tablets, students can virtually dissect and explore 3D visualizations of real human and animal anatomy. With over 1,000 studies in our library, students can examine hundreds of examples of pathology, variations, animal specimen, and more.

### **INTEGRATES INTO EXISTING RESOURCES**

“You will be amazed at how **EASY BODYVIZ IS TO USE.** Without any previous knowledge students will learn and comprehend 3D anatomical relationships more effectively.”

Students will be  
**CAREER READY**  
as BodyViz uses the same  
**IMAGING TECHNOLOGY**  
that they will encounter  
in the medical field.

## **EXPAND** ACCESS TO REAL ANATOMY

BodyViz delivers access to real human and animal anatomy by creating easy to use, interactive 3D visualizations. BodyViz:

- ✓ Integrates easily into all levels of anatomy curriculum
- ✓ Provides access to an unlimited number of students
- ✓ Allows users to rotate, pan, zoom, dissect, and fly through anatomy
- ✓ Encourages collaborative learning environments
- ✓ Integrates directly into learning management systems
- ✓ Delivers real anatomy via iPad, computers, and in large-format 3D stereoscopic virtual reality

## **EXPLORE** COMPLEX ANATOMICAL RELATIONSHIPS

BodyViz provides real anatomy for repeated, non-destructive exploration, examination, and dissection. Users visually explore the body's complex systems, highlight normal and abnormal anatomy, annotate anatomical features, and more. Students using BodyViz will be career ready as our solutions use the same imaging technology they will encounter in the medical field,

## **INTERACT** WITH REAL ANATOMY IN ANY LOCATION

BodyViz expands the learning experience to students in any location. With direct learning management system integration, students can access real anatomical content where ever they are using our eLearning modules. BodyViz eLearning modules enable instructors to share datasets, lessons, and assignments for students to complete.

**Get Started Today**  
**for \$2,500 per year**

Our subscription pricing was designed to provide high schools a cost-effective way of enabling their students to engage with real human and animal anatomy. Additional software licenses can be added to your subscription price for \$500/year.

## **What's Included?**

- 5 BodyViz software licenses
- 25 data sets of your choice
- 12 overview eLearning modules
- BodyViz training and support
